

SOUTHERN AFRICAN GAS ASSOCIATION

Ensuring all persons working in the methane-based environment are competent to undertake work which complies with the relevant legislation and national health and safety standards in order to provide safe and efficient operations from point of supply to users in the domestic, commercial and industrial markets within Southern Africa. Covers Industrial Thermoprocessing, Compressed Natural Gas (CNG), Liquefied Natural Gas (LNG), Biogas, and Natural Gas Vehicles (NGV)....

- *Providing training to persons working in the gas industry to become competent gas practitioners*
- *Developing skills, competencies and ensure knowledge sharing throughout industry*
- *Assisting industry to comply with legislation*
- *Educating stakeholders in safety and standards*
- *Advocating the safe and efficient use of gas and pressure equipment*
- *Interfacing with government on regulatory issues*

SADC Partnering Prospective...

SKILLS

1. Establishing bilateral partnerships
2. Involvement in the Southern African Development Community for Standards (SADCSTAN)
3. Expansion into NGV and Industrial CNG/LNG/Biogas environments
4. Collaboration with stakeholders on the adoption and development of Health and Safety Standards
5. Ensuring safety through training and skills upliftment
6. Registering competent persons to work on gas systems
7. Practical assessments of competencies and compliance requirements for gas systems; installation, operations, maintenance, commissioning, start-up and shut down activities and much more. . .

Safe Gas Equipment

Verifying Natural and Liquefied Petroleum Gas Industrial Equipment locally manufactured, imported and supplied prior to being placed in the market. Covers all equipment operating above 0.5 GJ/h or 10 kg/h or 140 kW in the Commercial, Industrial and Specialised environments. Being expanded to include NGV, Natural Gas fueling stations, CNG and LNG Industrial applications. *The intent is to prevent the import and supply of non conforming equipment and that all equipment sold or placed in the market meets the respective legislation*
